

UNIVERSITY OF GUELPH  
College of Social and Applied Human Sciences  
Department of Sociology and Anthropology

*Fellowship Offered*

We offer one fellowship of up to \$6,000 per year for two years to join a project on multimodal anthropology and climate change in the Himalayas. The successful applicant will conduct a research project in a field site of their choice in either India, Bhutan or Nepal. The project will investigate how multimodal methods can contribute to discussions about climate change and climate justice in the Himalayas. The project can focus on the use of photography, digital video, interactive media, or digital storytelling. Collaborative initiatives, with research participants directly involved in producing multimodal outputs, will be especially welcome.

The student will pursue a Master's Degree in Public Issues Anthropology at the University of Guelph under the co-supervision of [Prof. Gagné \(University of Guelph\)](#) and [Prof. Philippe Messier \(University of Prince Edward Island\)](#). The case study developed by the successful applicant will contribute to the broader project "Multimodal Storytelling and Citizen Science for Climate Justice in the Himalayas," led by Prof. Gagné and supported by the Social Sciences and Humanities Research Council of Canada (SSHRC).

The fellowship is offered **in addition** to stipend funds offered by the Department of Sociology and Anthropology. It will consist partly of funds for fieldwork and partly of a Research Assistantship. Additional funds may be available for relevant conference travel.

Expected start date is fall 2026. Interested students should review admission guidelines for the Master's program in Public Issues Anthropology (<https://socioanthro.uoguelph.ca/future-students/public-issues-anthropology-ma>) and are strongly encouraged to reach out to Prof. Gagné before submitting their application. Inquiries can also be directed to Prof. Gagné: [gagnek@uoguelph.ca](mailto:gagnek@uoguelph.ca)
